# 7										
# 8										
# 9										

Please evaluate the various segments of an oral or poster presentation:

1. Has the justification for the work been laid out?
2. Were the methods well described and adequately explained?
3. Were the results/data ample enough to make a conclusion(s)? For “a work in progress”, was the prospect for successful completion reasonable?
4. Were conclusions made? (were they on-target, non-existent, or overstated?)
5. Did the speaker/presenter demonstrate or convey knowledge and authority on the topic? Or did it seem ‘scripted’ (include authors’ own presentation to you at poster or oral presentation as well as from responses to questions of yours or from others).
6. How were the visuals used for the presentation (slides or poster)?

Please provide feedback, comments and suggestions for improvement for each presenter on the attached comments forms.
